## Last Year Prediction: 2022

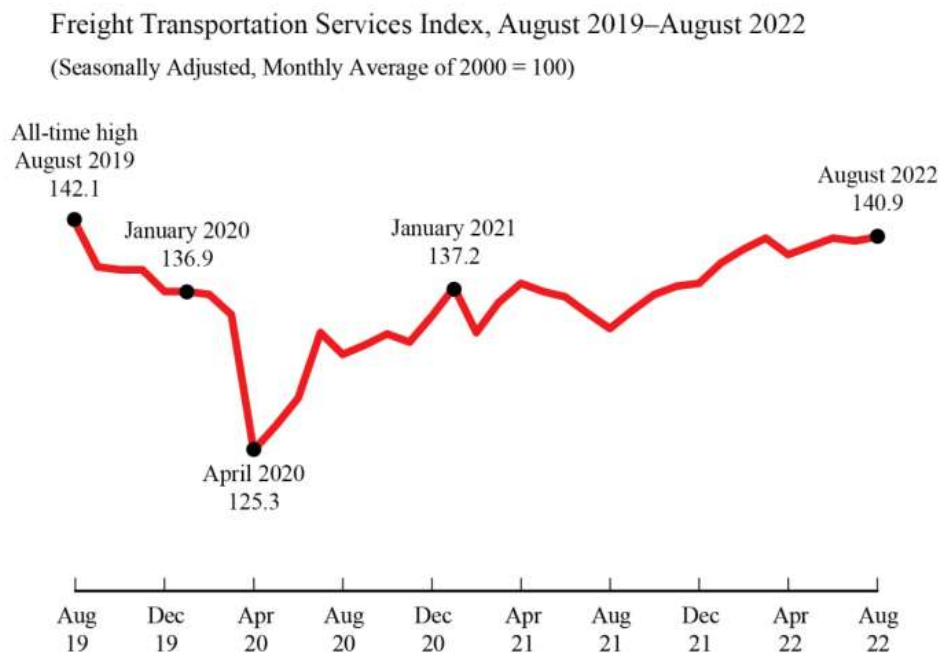

### Prediction:

*Like last year, the conflicts and issues with trade war will continue this year. This year theme is transportation. The fast moving transportation (e.g. courier and delivery business) will continue to flourish this year. With the high vaccination rate among most of the countries around the world, there is uplift in travel and leisure. However, due to rigid requirement, people may be put off with travelling.*

### Results:

As predicted, the trade war continues and the situation becomes worst with Russia invasion of Ukraine, which causes major shortage of food around the world. In addition, with the embargo being imposed on Russia, a lot of countries are suffering. There is a major crisis happening at Sri Lanka where the inflation is at 50%.

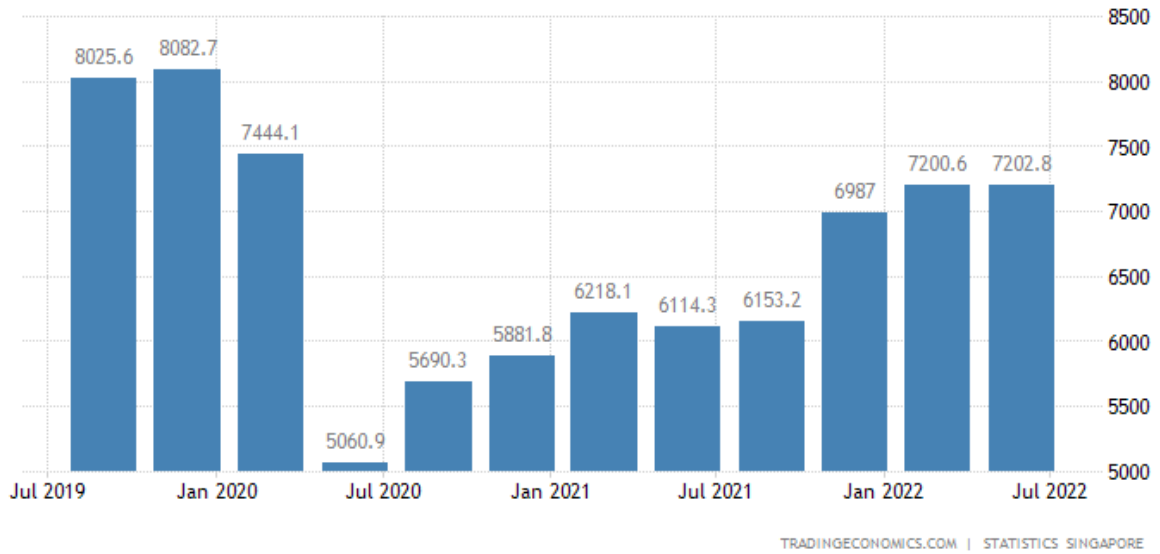

Transportation continues to thrive around the world. In the US, the Bureau of Transportation Statistics (BTS) shows an upward trend.

In Singapore, the GDP from Transport in Singapore increased to 7200.60 SGD Million in the first quarter of 2022 from 6987 SGD Million in the fourth quarter of 2021.

In the long-term, the Singapore GDP from Transport is projected to trend around 7376.00 SGD Million in 2023 and 7561.00 SGD Million in 2024, according to our econometric models.

As predicted, there is an upward trend in travel and leisure but IATA predicted that airline industry will only return to profit next year. Airlines have to deal with high fuel prices which push airlines to hike fares. According to IATA, international travel in Asia in 2021 was only at 7 per cent of what it was in 2019, compared to 25 per cent worldwide. In the first quarter of this year, it had increased to 60 per cent in places like Europe and North America, but only 17 per cent in Asia. This is because of the slower openings in Asia, New Zealand and Australia this year and China's strict zero-COVID restrictions.

**Prediction:**

*The Covid-19 situation is not improving as the vaccine is not performing as expected. People still can get infected by Covid-19 but they will be able to recover faster and better. Constant booster shots are required.*

**Results:**

At the time of writing, the Covid-19 situation is not going away as the virus continues to mutate and people are getting infected. With the vaccination and booster, people are recovering faster with less severe conditions. Countries around the world are still imposing periodic lockdowns due to the spike in infection. China's zero COVID policy implementation is taking a toll on the country as well as their citizens. It is also affecting the rest of the world as travelling to and from China is still restricted.

**Prediction:**

*The economic recovery remains as an issue as per last year with very slow recovery. This will probably continue for the next 2 years. As mentioned last year, the medical industries and any unconventional industries will continue to flourish.*

**Results:**

With countries moving towards endemic mode and herd immunity, most of these countries are opening up to allow better flow of people and trade. However, Russia's invasion on Ukraine has caused oil price to sky-rocket and major inflation worldwide. On top of that, with the lockdown due to Covid-19, most of the industries already wind down to the minimum. With the openings, industries will need time to restart again. Since winding down, a lot of staff has been retrenched and this staffs is no longer available. It will take time to hire and train staff again.

A quick check on the Qi Men Dun Jia chart for next few years, the economy recovery will only happen in 2<sup>nd</sup> half of 2025.

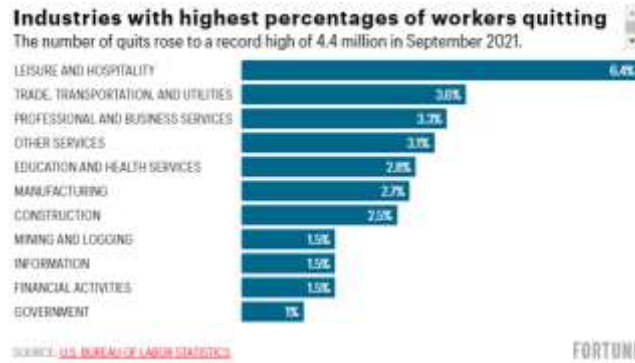

**Prediction:**

*The job market will pick up this year with more people changing jobs after being stagnant for the last 2 years. There will be more job movements in the education industries and sales.*

**Results:**

The great resignation wave started around December 2021/January 2022 and as of July 2022, it showed no sign of slowing down. In fact, Fortune magazine reported that 40% of US workers are considering quitting their jobs. Fortune magazine reported that Leisure and Hospitality industry was the hardest hit, followed by Trade, Transportation and Utilities.

**Prediction:**

*The entertainment industry (night club, KTV, pub etc.) will continue to be sluggish and losing money.*

**Results:**

Singapore government announced that all night life businesses including KTV and night club can reopen from 19<sup>th</sup> April 2022. However, for some establishments, a negative ART result done within 24 hours is required and this test has to be supervised. Such requirement may put off some people from going.

**Prediction:**

*Divorce rate will stabilise this year.*

**Results:**

2022 statistics are not available yet. In 2020, I predicted that 2021 divorce rate will go up. As released by Singapore Department of Statistics, in 2021, there was an increase of 13.4% in divorce.

## Year 2023

This year, 2023 is Gui Mao (癸卯) Rabbit Year. The Rabbit year starts on 4<sup>th</sup> February 2023 at 10:42 hour. However, for Qi Men Dun Jia yearly prediction, we will be using the date and time of Chinese New Year Eve to plot the chart and perform the analysis. The main reason is that the human Qi during this time is strong as every Chinese will be celebrating the Chinese New Year. This is to be in line with the Heaven, Earth and Human concept (天时, 地利, 人和). This year, Chinese New Year occurs on 22<sup>nd</sup> January 2023. Technically, this year Chinese New Year, the year of Rabbit has not commenced yet.

Unlike last year, there will be a sign of toning down of trade wars between countries. This year theme is financial and economy and there will be huge loses in financial and economy. The effect of trade war is showing sign which is dire to the economy. Those in banking/finance, transportation/logistics and property will see signs of missing targets and money losing. This is a clear indication of recession.

There will be an exponential trend in tourism but the industry will continue to struggle with manpower and infrastructure issues.

The Covid-19 situation worldwide will remain as status quo where we will see new variances emerging once a while and cause some fear and anxiety to everyone. Although there is available vaccine, there is a need to constantly develop new vaccines to catch-up with the ever changing of Covid-19 mutations.

Unlike last year, there will be a slowdown in fast moving transportation (e.g. courier and delivery business). This may be due to the slowing down of the economy. However, the entertainment industry (night club, KTV, pub etc.) may see an upward trend in recovery.

Likewise, the education industry may see an upward trend where more people will go back to study to pick up new skills.

For job market, after enjoying a rosy year last year, we may see more job cuts or downsizing due to economic recession. There may have a sign of mass retrenchments.

Relationship and partnership may have issue this year. For those who are married, need to be extra careful. For business partnership, there may have a sign of break-off in partnership.
